NOVEL DIALOGUES

From CEO's Desk

As we take a deeper dive into understanding the gamut of the MHE business, we realized that Indian customers' requirements are unique and more practical. Traditional equipment with pre-designed specifications is not always the most optimal solution. Hence, we have now developed a display module, which will essentially serve as a platform to showcase more relevant, realistic, and cost-effective MHEs at our workshop facility. These include docks, scissor platforms, forklift trolleys, and tuggers, to name a few.

Inviting prospective users to see, use, and understand their applications will be the new marketing tool we plan to capitalize on. The importance of safe working procedures at all times has led us to conceptualize a state-of-the-art facility to undertake various training programs at the new premises. In consultation with industry leaders and experts, we plan to initiate more such coaching programs, which will prepare new graduates and greenhorns to be industry-ready while keeping senior veterans fit and agile.

Mr. Ravikiran Gadgil

We deeply mourn the sad demise of the industry doyen, Honorable Shri Ratan Tata Sir, who has been an ever-shining beacon of righteousness, integrity, and compassion throughout our professional journey. To cite a few of his favorite quotes: 'No one can destroy iron, but its own rust can.' 'If you want to walk fast, walk alone. But if you want to walk far, walk together.'

As a twist of fate, we finally enter as a service provider to this respected group.

As we once again brace for the state elections, business sentiments look up to a stable and decisive government that will attract more investments and facilitate ease of doing business. Our successful stint with a reputed beverages company and a leading automobile giant has kept sentiments upbeat, despite a general sluggish demand and an overly stocked MHE inventory.

Our Products

3T Hyundai Li-ion battery forklift 3 NOS supplied to pump manufacturers in M.P.

3T Hyundai forklift delivered for foundry application

2T Hyundai Reach Truck 2NOS delivered to a renowned automobile manufacturer

6 NOS of 2T Li-ion battery forklift supplied to Beverages Industry

3T forklift, 2.5T reach truck, 8T forklift, and 12m working height scissor lift supplied for a government project in Maharashtra

Our Services

Major Refurbishment of EOT crane 10 Ton to 30 Ton @10 NOs carried out at major steel Giant

Maintenance for other model forklift

Total Refurbishment of mast lift in Aurangabad

Our Team

Our Activity

Ganesh Festival Celebrations

Deepavali and Lakshmi Poojan

Dasara Celebration

Inspection, Health Checkup and Certification Forklifts and EOT Cranes

- To know present condition of Equipment
- To gauge Refurbishment / Repair Cost
